Lustenau, 12th of November 2026

Hazardous and restricted materials in accordance with EU Directive 2011/65/EU (RoHS), as amended

Dear Sirs,

conformity with the RoHS Directive is not required for our gearboxes, as RoHS applies to electrical and electronic equipment. Our gearboxes are mechanical products.

The electrical and electronic add-on components are motors, limit switches, sensors, etc. For these components, we have confirmation from our suppliers regarding their RoHS compliance.

Nevertheless, we confirm to our customers that our **standard products comply with the substance restrictions** of the above-mentioned Directive. Based on the information currently available to us, none of the following substances are knowingly contained in homogeneous materials above the permitted limit values, unless an applicable exemption according to Annex III of Directive 2011/65/EU, as amended, applies:

- **Lead (Pb): 0.1%**
- **Mercury (Hg): 0.1%**
- **Cadmium (Cd): 0.01%**
- **Hexavalent chromium (Cr VI): 0.1%**
- **Polybrominated biphenyls (PBB): 0.1%**
- **Polybrominated diphenyl ethers (PBDE): 0.1%**
- **Bis(2-ethylhexyl) phthalate (DEHP): 0.1%**
- **Butyl benzyl phthalate (BBP): 0.1%**
- **Dibutyl phthalate (DBP): 0.1%**
- **Diisobutyl phthalate (DIBP): 0.1%**

With best regards

ZIMM GmbH
